THE AIRSTREAM FAMILY IS GROWING!

An innovator for over 60 years, Trovac continues to bring you new products that draw on our expertise and the latest technologies to meet new needs and trends.

In line with our mission to make your **environment healthier**, the Airstream family now offers air purifiers that use ultraviolet light, a proven technology that helps reduce **99.97% of pollutants in the home**.

In today's increasingly well-insulated homes, less fresh air gets in from outside, which means bacteria can develop and circulate indoors. Air exchangers and ventilation systems just don't cut it. But when ultraviolet light is used in an air purification system, it **helps reduce microscopic particles** and provides safe, **clean air** throughout the home.

Here are some good reasons to get an Airstream UV portable air purifier:

- Protects against airborne pollutants
- Reduces household odours
- Helps prevent allergies
- Relieves asthma symptoms
- Improves sleep
- Helps reduce chemical VOCs
- Easy to clean

UVC light helps reduce 99.97% of pollutants

Purifies up to 1,012 sq ft

310 Model

Portable UVC air purifier

The 310 Airstream UV air purifier is lightweight, easy to move and can be positioned on the floor or on a piece of furniture.

- Touch panel
- Timed shutdown
- With an air flow rate up to 135 CFM

510 Model

Portable UVC air purifier

The 510 Airstream UV air purifier can be positioned in the room of your choice.

- Touch panel
- Displays the timer, temperature and relative humidity
- With an air flow rate up to 206 CFM

Purifies up to 1,545 sq ft

FEATURES

4 manual fan levels • Turbo mode • With automatic function to adjust the cleaning performance to the ambient air • Timer function (510: 1-24 h / 310: 2, 4 or 8 hours) • Replaceable filter with filter change indicator • 2 year warranty

- **Tuya Smart app**
Convenient control and monitoring of ambient air both at home and on the go via the Tuya Smart app.

- **UVC Light**
Additional air cleaning using an ultraviolet light.

- **Night mode**
With night mode: ultra-quiet operation and dimmable operating panel.

- **PM Sensor**
PM 2.5 sensor – recognizes particles up to 2.5 µm in size.

- **Ionization**
More than 3 million / cc of negative ion power.

- **HEPA H13 Filter**
High efficiency air particle filter: this filter helping trap dust, smoke, pollen and other allergens in the air. It helps filter 99.97% of particles.

- **Air quality indicator**
With 4 colors changing according to the current air quality.

AIR QUALITY INDICATOR

- Red → Heavily Polluted, PM 2.5 = ≥150
- Orange → Lightly polluted, PM 2.5 = 100-149.9
- Yellow → Moderate, PM 2.5 = 50-99.9
- Blue → Good, PM 2.5 = 0-49.9
